THE HEART OF EVERY GREAT MACHINE

*To Akxa Power Generation family;*

*I would like to share with you the joy and pride I felt when I learned that the largest airport in history of our Republic and the greatest airport in our country will be supplied all its power requirement by Akxa Power Generation.*

*I can clearly see the fact that we are taking sure and firm steps towards our vision which is to become a well-recognized world-brand through this and similar accomplishments we win against the strongest competitors in the global market.*

*I would like to sincerely thank our precious employees for their giving us the hope for future as well as the courage and strength to head out for new objectives in a dire business environment, with their support from the first day of our organization.*

*I wish continuous success for Akxa Power Generation family and congratulate them for their selfless efforts.*

*Sincerely,  
Ali Metin Kazancı*

# A GENERATOR IS PURCHASED ONLY ONCE FROM AKSA!

Never take a risk on a generator. Choose **Aksa**, who is the unrivaled market leader in Turkey, to protect your business and home from power outages that result in lost production, lost earnings, and convenience. **Aksa** provides unlimited customer satisfaction with its 24/7 services and is a global player selling generators to 160 Countries on 5 Continents. Purchasing your generator from **Aksa** ensures that you will enjoy a trouble free experience during the lifetime.

**aksa** POWER GENERATION

Continue life without interruption!

Aksa Jeneratör Sanayi A.Ş. is a member of  KAZANCI HOLDING

ALPER PEKER  
Aksa Jeneratör-CEO

**“WE FEEL PROUD THAT WE WILL BE OFFERING OUR SERVICES FOR THE LARGEST AIRPORT PROJECT OF TURKEY.”**

*We are happy to be presenting you the last Aksa Jenerik magazine of the year 2016.*

*The year 2016 has been a year in which our country experienced certain unrest and turmoils, however in the meanwhile Aksa Power Generation which is one of the most important companies in its field, expanded its range of facilities and undertook large scale projects continuing towards its objectives while growing stronger. A leading team will shine brighter, when its leading players become stars. Leadership of Aksa Power Generation is achieved thanks to our teammates who did not hesitate to undertake responsibility and leadership. In 2016, we feel the deserved pride of sustaining this state of accord, which is our greatest source of confidence for 2017.*

*As Aksa Power Generation, we sustain our successful portfolio. Turkey's leading generator manufacturer Aksa has been chosen as the power supplier of İstanbul New Airport Project. The world's largest airport project with its yearly passenger capacity upgradable to over 200 million passengers, will have a 7/24 live infrastructure. We will supply any power requirements of the airport with our generators and we will make sure that corresponding services are uninterruptedly operational. For the world's largest airport project, as Aksa Power Generation family we will submit our best efforts and what this responsibility requires.*

*There are more of the good news. We are achieving our objectives one by one, through our diligent and selfless efforts. As Aksa Power Generation, we took one more step towards gaining further strength in Africa market. We have been active in Africa market during the last 20 years and this year we have secured our position further in the region by including Southern Africa and Ghana in our area of activity through new investments.*

*As the leading generator company of Turkey, we follow the technological trends closely and we always include technology factor in our strategy. The Remote Monitoring System(RMS) which we present, offers the comfort of an uninterruptible service. We make status information and all operational parameters available through remote access system which allows remote controlling and assistance. Hence we are able to prevent any possible problems with the generator and act on an immediate basis.*

*We believe that for the generator sector companies to be able to keep up with changing customer requirements, R&D has to remain as the company's priority. In this regard, we will continue our works aiming at developing green and innovative products.*

*We have allocated a remarkable share from the budget for R&D works, and we are planning to take the lead in the generator sector by establishing a fully-equipped R&D and innovation center in 2019.*

*Along with all these positive developments we sincerely celebrate the new year of our providers, employees and business partners. We wish 2017 be a year of success for both our country and the company.*

*With love and respect,*

*“İstanbul New Airport(İGA) chose Akxa Power Generation as the power supplier of Turkey’s largest Airport Project.”*

## AKSA POWER FOR THE NEW AIRPORT

*İGA chose Turkey’s leading generator manufacturer Akxa as the power supplier of İstanbul New Airport. Within the scope of the agreement made with İGA, Akxa will install 42 2500 KVA power generators, supplying 105 MVA energy for İstanbul New Airport.*

**A**lper Peker, Akxa Power Generation CEO stated that they are proud to be offering services for Turkey’s largest airport project and said that “The world’s largest airport project with its yearly passenger capacity upgradable to over 200 million passengers, will have a 24/7 live infrastructure. In such a massive structure where the passengers comfortably get ready for their flights and in the meanwhile hundreds of thousands of flights are being coordinated, the power is one of the major requirements. Within the scope of the coordination we have established with İGA, we will be performing an installation which is equivalent to a medium scaled power plant. We will supply any power requirements of the airport with our generators which work synchronous with the mains electricity and we will make sure that corresponding services are uninterruptedly

operational. For the world’s largest airport project, as Akxa Power Generation we will submit our best efforts and what this responsibility requires.

### CONTINUOUS AND EFFICIENT COOPERATION

İGA Airports Construction CEO Yusuf Akçayoğlu stated that they are pleased with İGA-Akxa cooperation and said that “In light of the latest technological advancements, we meet any requirements and perform any works for İstanbul New Airport, which will become one of the most significant aviation centers around the world, to offer exclusive service”. Energy is one of the most important requirements in such a large scaled project. In this regard, thanks to the cooperation we have established with Akxa, a market-leading corporation, any operations will be flawlessly accomplished”.

# A TRUE PARTNER

AKSA has collaborated with Volvo Penta for many years, but with a newly enhanced partnership, customers now have access to a variety of products equipped with Volvo Penta's premium engines. Giorgio Paris, head of Volvo Penta's industrial engine segment, talks about the current market for gensets, as well as the benefits of Volvo Penta engines for AKSA customers.

## **What is the market climate for gensets at the moment? Where does Volvo Penta see the most growth in power generation?**

With the Turkish government in flux following the June election, the market there is showing signs of caution – buyers are hesitant to invest, though the market seems to be holding steady. For Volvo Penta, hotspots for genset development have been further south: in Northern Africa; in the Middle East – mainly Qatar, Saudi Arabia and United Arab Emirates, where growth has been driven by infrastructure development; and in South Africa, caused by an insufficient power supply.

The Chinese economy continues to lag – construction, mining, oil & gas and infrastructure investment are all low – but we've seen good development in gensets driven by the pre-buy effect from upcoming China III emission legislation. Meanwhile, genset builders located in Europe are capitalizing on the weakness of the euro to improve their competitiveness on the traditional market. The only country where the economic outlook is truly positive is the US.

We don't expect the global economic climate to change drastically, so we'll likely see consistent demand until the end of the year.

## **How does Volvo Penta work with AKSA?**

Volvo Penta has collaborated with AKSA for many years, but

it's only been recently that we have really strengthened and grown our relationship with them. They are one of the biggest independent players in power generation, and we are interested in continuing to develop our relationship with them in the future because we feel our engines are a good fit for their applications. We now supply AKSA with engines from our complete range, and our ambition is to be one of their top suppliers. We are great believers in the AKSA brand; they're one of the strongest players out there.

## **What can Volvo Penta offer AKSA customers?**

As a member of the Volvo Group, we're part of something much bigger than ourselves: we have access to the Group's parts distribution system, dealer network and R&D budget. Through our global dealer network of 3,500 dealers in over 130 countries, we are prepared to take care of AKSA machines wherever they are sold in the world.

Our power range – 80 to 700 kVA at 1,500 rpm – is well suited for AKSA's powergen applications. As a premium supplier, we offer premium products: durable, fuel efficient engines, renowned for their long uptime and low total cost of ownership.

We also offer AKSA the benefit of working with an independent supplier. Volvo Penta doesn't produce its own gensets, allowing us to be a true, more trustworthy partner.

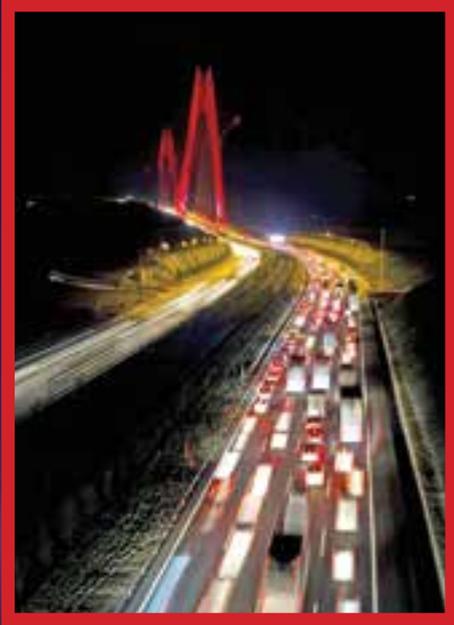

**VOLVO  
PENTA**

*“Aksa Power Generation will have a significant role in lighting of Northern Marmara Highway.”*

# AKSA SUPPORT FOR NORTHERN- MARMARA HIGHWAY

*Aksa Power Generation will be supplying power for Northern Marmara Highway which will become the most important means of transportation. Aksa Power Generation will install 35 17 MW generator sets therefore providing the passengers with uninterruptible energy.*

**A**ksa Power Generation CEO Alper Peker states that Northern Marmara Highway is a globally important project and they are proud of their involvement in this project and said "As Aksa Power Generation we undertake very significant projects all around the world. Our chief responsibility is to offer what is best also for our country. The support which we offer towards making our country closer to its objectives, will bring us a brighter future together with Turkey".

***"The support which we offer towards making our country closer to its objectives, will bring us a brighter future together with Turkey".***

# AKSA OFFERS REMOTE ACCESS TECHNOLOGIES FOR GENERATORS

*Aksa meets the power requirements periodically and continuously, meanwhile providing its clients with the Remote Monitoring System which allows technical controls of the generators from anywhere on earth.*

The Remote Monitoring System(RMS) offered by Turkey's leading generator brand Aksa, provides its users with the comfort of an uninterrupted service. Status information and all operational parameters are available through remote access system which allows remote controlling and assistance. Aksa Power Generation CEO Alper

to". Thanks to the software utilized in the system, any possible failure or malfunction is transmitted to central system immediately: "The system allows trouble shooting and makes technical intervention easier and when remote intervention is required it is possible to de-activate the generators through the system. As Aksa Power Generation, our objective is to offer uninterrupted service by means of resolving any possible issues through Remote Monitoring System as soon as possible."

***"Aksa Power Generation with its fast and high quality service principle, uses SIM card technology in its generators for rent, in order to provide immediate support to its clients who benefit from generator rental service."***

Peker states that they are able to prevent any possible problems with the generator through the central system, and act on an immediate basis, and he adds that "We maintain our 100% customer satisfaction criteria also for after-sales services. Our corporate and individual clients who wish to monitor their generators, are able to benefit from Remote Monitoring System which we offer, if they prefer

## **ALTERNATIVE ACCESS SYSTEMS FOR GENERATORS**

Aksa Power Generation CEO Alper Peker states that they offer generator access through cable internet connection or GSM technology for their individual or corporate clients, and he says "Generators are of great importance in order to be able to get over electricity cut-offs with minimal loss. For our clients who wish to keep their generators under control, we offer alternative monitoring systems. From any location on earth, users can access their generators and where internet is not available, they can instead insert a special sim-card to the devices, and successfully control the devices. Corporate or individual clients who use Aksa Power Generation's remote monitoring technology, can also view the oil pressure, engine status, fuel and accumulator levels".

***"Aksa provides its clients with a variety of remote monitoring system alternatives, such as those which are based on cable internet or SIM card technologies, making it possible for them to be able to control their generators from wherever they wish."***

# NEW OPPORTUNITIES IN THE MARKET

Aksa Power Generation, has been the platinum sponsor for International Powerelec Ghana 2016 which was held in Ghana.

International Powerelec Ghana 2016 brought together the companies active in Energy sector in Accra, the capital city of Ghana, on 1-3 September 2016. Platinum sponsor of the exhibition was Aksa Power Generation. Aksa Power Generation CEO Alper Peker pointed out that Africa is an location for investments and said "Ghana is a strategic and significant location for energy sector. At Powerelec Ghana 2016 which we participated as the platinum sponsor, we took an important step towards showing the world that we have a serious energy potential. As Aksa Power Generation we participate in these exhibitions which are important in order to keep a close watch of the present market conditions and to be able to utilize the opportunities. This lets us take various opportunities in new markets".

## INCREASING DEMAND IN GENERATOR MARKET

*Market trends in construction sector, which contains in itself 300 sub-sectors, directly reflect on the country's economy. Today, construction sector grows rapidly and generators which provide uninterrupted power are of great significance.*

Aksa Power Generation CEO Alper Peker points out that most construction companies do not start their work without a generator, and adds that "We presume that the movement, which was triggered in residential sector by the sales campaigns, will be felt in short and long term also in the markets which are connected to construction sector". The sector is in a rapid growth trend. In order to get the most out of your investment, you need to provide what matters most today: uninterrupted energy. We believe that generator sales will increase with the sector gaining further momentum. Alper Peker underlines that generator is a very sensitive

topic and says "In order to prevent future complications, people must ask the brand of the generators when they're buying houses. In Turkey there are many generator sellers which produce their generators in small areas. What one expects from a generator is that it must kick-in/switch over in case of an electricity cut-off without any issues. Besides that it is important for the customers that they can receive after-sales service from the generator company".

# GIANTS OF ELECTRICITY SECTOR CONVENE AT ELEC EXPO

*10th Elec Expo Exhibition which was held under chief coordinatorship of Moroccan National Federation of Electricity, Electronics and Renewable Energies (FENELEC) brought together thousands of sector professionals. Aksa Power Generation, leading brand in Turkey's generator production took part in the exhibition in order to present its products and to open up to new market environments.*

10.Elec Expo Exhibition took place on 12 - 15 October. The exhibition brought together thousands of sector professionals from Africa, Middle East and Gulf Countries. The exhibition offered opportunities to enhance the commercial volume of its 7000 participants thanks to visiting high-end buyers from partner countries and the protocol. Aksa Power Generation which presented its new products has become a focus of attention by its green and energy-saving range of generators.

***The exhibition offered opportunities to enhance the commercial volume of its 7000 participants thanks to visiting high-end buyers from partner countries and the protocol.***

## AKSA POWER GENERATION SECURES ITS POSITION IN AFRICA

*Aksa Power Generation which is one of the top 5 generator manufacturers of the world and exports its products to 160 countries, participated in Electra Mining Africa Exhibition which brought together the international companies and visitors. The exhibition took place on 12-16 September 2016 and it hosted over 800 companies from electric&electronics, engineering, design and mining sectors.*

**A**ksa Power Generation secures its active position in Africa markets and participates in Electra Mining Africa Exhibition which is held in Johannesburg every two years. At Electra Mining Africa Exhibition which hosted thousands of visitors, over 800 companies from various sectors such as electric&electronics, engineering, design, mining, marble and natural stones, have displayed their new products. Hundreds of machinery and equipment have been presented through live shows accompanied by seminary and conferences created an ideal environment for new business relations to be established. Aksa Power Generation, which sustains its activities and ventures in Africa market, has proven its influential presence in the region once again by participating in Electra Mining Africa Exhibition.

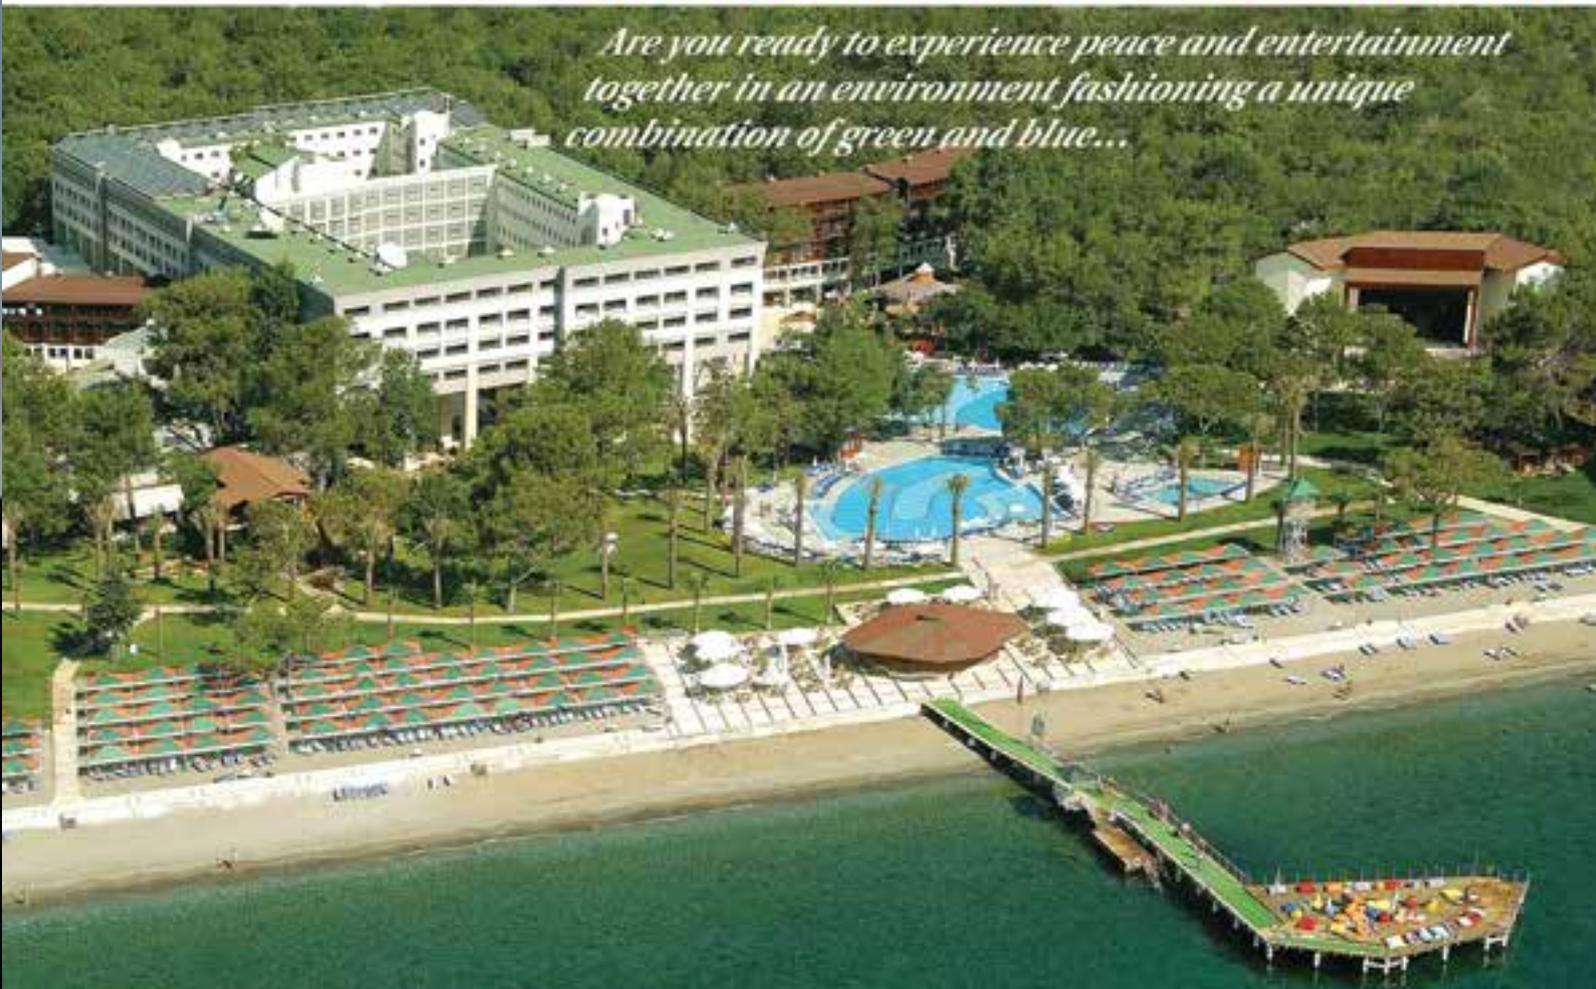

### **EXPORTATION TO 160 COUNTRIES**

Aksa Power Generation which has production facilities in Turkey, China and USA, as well as its sales offices in United Arab Emirates, Vietnam, Russia, England, Dubai, China, Algeria, USA, Singapore, Iraq and Kazakhstan exporting to 160 countries, maintains its position as a focus of attention at various international exhibitions.

# R&D MAKES THE DIFFERENCE IN GENERATOR SECTOR

*For the generator sector companies to be able to keep up with changing customer requirements, R&D has to remain a company's priority. Generator sector's global standards are determined by the companies which develop green and innovative products. Aksa Power Generation allocates a remarkable share from the budget for R&D works, and it is planning to take the lead in the generator sector by establishing a fully-equipped R&D and innovation center in 2019.*

**T**oday the demand for energy is globally on the rise and generator sector holds an important place in this regard. What makes a generator company different from another in the market is to keep a close watch of the technological advancements and to develop new products through R&D to catch up with changing requirements. Aksa Power Generation CEO Alper Peker stresses the fact that leading the sector can only be possible through efficient R&D, saying: "As a company with Turkish origin, thanks to our R&D investments we are among the top 5 generator manufacturer brands around the world. By following the customer requirements and world trends closely, we are developing our products by our teams in Turkey and America. As Aksa Power Generation, our objective is to establish a fully equipped R&D and innovation center by the end of 2019. We will have an infrastructure allows continuous development of innovative products, hence proving our leading position in the sector globally."

## RENEWABLE ENERGY ON AGENDA

Aksa Power Generation sets the basis for its R&D works, as renewable energy resources and sets as its objective the sustainability issue, which is the focus of world industry at present. Alper Peker, Aksa Power Generation CEO states that they work on developing green products, silent generators and generators with shorter kick-in/switch over time, and says: "As a result of the successful studies we have performed on renewable energy resources with our R&D team; we managed to add our hybrid generator project to the range of products we offer. We presented our hybrid project for the first time at Bauma Exhibition in Germany which took place a few months ago. The project is created by means of integrating the renewable energy resources into generator sets".

**Aksa Power Generation-Ceo Alper Peker:**  
**"We particularly work on developing green products, silent generators and generators with shorter kick-in/switch over time".**

## ENERGY SECTOR CONVENES AT CENTRAL ASIA

*Uzenergy Expo 2016 was held on 21-23 September and it hosted worldwide manufacturers and providers of energy generation equipments. It was held in Tashkent, capital city of Uzbekistan and Aksa Power Generation which is one of the global brands of electric industry, participated in the exhibition.*

**U**zenergy Expo 2016 is one of the Central Asia's most significant exhibitions and it is often considered to be a reference point for energy generation equipments. Between 21st and 23rd September it hosted thousands of visitors with domestic and foreign origin. During the exhibition, participating companies presented their products and environmental control equipments and their expertise to foreign companies, and Aksa Power Generation has met remarkable contacts. At Uzenergy Expo 2016, Aksa Power Generation which exports to numerous destinations worldwide and participates in exhibitions organized in various locations around the world; shared its expertise and solutions with remarkable companies of the sector.

## AKSA IS THE SILVER SPONSOR OF 23. WORLD ENERGY CONGRESS

*Turkey is getting ready to host 23. World Energy Congress. The congress will be held in İstanbul and Aksa Group supports it as The Silver Sponsor.*

"World Energy Congress" is the most significant event of World Energy Council and 23rd congress will be held in İstanbul this year. The congress which is held between 9 - 13 October, is supported by leading companies of the industry. The congress will be held in İstanbul and Aksa Group supports it as The Silver Sponsor. 23. World Energy Congress is special as it is the most extensive energy summit to be organized after COP21. Koç Holding Chairman of The Executive Board, Ömer Koç, Sabancı Holding Chairman of The Executive Board Güler Sabancı and Socar President

Rovnag Abdullayev made their speeches. Saltuk Düzyol who is CEO of the Trans-Anatolian Natural Gas Pipeline Project(TANAP) which is one of the major projects of SOCAR as well, presented his speech. The congress established a dialogue environment through "World Energy Leaders", "Energy Leaders of The Future" and "World Energy Trilemma" summits between Energy Ministers, global business, finance and academic environments leaders coming from all around the world who seek for solutions of national, regional or global sustainable energy.

## AKSA POWER GENERATION INCREASES ITS INVESTMENT IN AFRICA

*Aksa Power Generation which has been active in Africa market for 20 years, is getting ready to make new investments meanwhile utilizing its know-how on the region. Aksa Power Generation's objective for this year is to secure its position in the region through new investments.*

**A**ksa Power Generation who maintains its leading role in Turkish market, is commercially active also all around the world with its sales offices in United Arab Emirates, Kazakhstan, England, Algeria and Singapore as well as larger markets such as China, United States of America and Russia. Aksa Power Generation has been commercially active in Africa market for 20 years and in order to further increase its power in the region, this year it organized South Africa and Ghana organizations as well.

### AKSA IS READY TO BECOME A PART OF AFRICA

Aksa Power Generation CEO Alper Peker states that Ghana economy is growing continuously and regularly, "Ghana is an encouraging country with its work force potential and resources. Through our activity in Africa,

we have envisaged this potential in energy market many years ago. We have established all our business plan aiming at becoming a part of this market. As Aksa Power Generation, we are ready to fulfill the energy need in the market". Alper Peker states that Africa is a significant investment area and says "With the potential it has, Africa is an important area with strategic significance for energy sector. At every exhibition and events which we participated in Africa, we took important steps towards showing the world that we have a serious energy potential . As Aksa Power Generation we participate in these important exhibitions in order to keep a close watch of the present market conditions and to be able to utilize the opportunities. This lets us take various opportunities in new markets".

## A VISIT TO AKSA'S PRODUCTION FACILITY IN İSTANBUL

**A**ksa Power Generation, the leader of the generator sector, is among the top 5 generator manufacturers of the world. By the year 2015; Aksa's business network consists of 160 countries, allowing it to offer its products to 7 continents and it has production facilities in China, USA and Turkey. AKSA makes difference with its modern production facilities and its Mahmutbey factory was visited by 12 press members coming from Democratic Republic of Congo, Ghana and Uganda. Aksa Power Generation maintains its leading role in Turkish market and it achieved a financial turnover of 400 million

Dollars thanks to its production facilities in Turkey, America and China as well as its commercial network in large markets such as Russia and United States of America alongside its sales offices in United Arab Emirates, Vietnam, Dubai, Chine, Ghana, Iraq, South Africa, Kazakhstan, England, Algeria and Singapore. Aksa Power Generation CEO Alper Peker states that they are among the top 5 manufacturers of the world and says "Especially abroad, we are making great progress. Accomplishing a two-digit development figure by means of increasing our market share in both domestic and global market, is among our objectives for 2016.

**AKSA makes difference with its modern production facilities and its Mahmutbey factory was visited by 12 press members coming from Democratic Republic of Congo, Ghana and Uganda.**

# WHAT WERE WE LOOKING FOR IN DIGITAL PLATFORMS THIS YEAR?

*Throughout 2016 we never stopped playing with our cellphones. What we used most in our digital searches was our mobile phones every time. As for the year 2016, what was that we searched for the most?*

**“In the year 2016, %55 of the searches were made through mobile devices and %45 was made through desktop devices”. %69 of the searches was made by men and %31 was made by women.”**

**R**esearches suggest that in digital platforms, mobile phones were the most frequently used search devices in 2016. %55 of the searches are made through mobile phones. %55 of the searches were made through mobile devices and %45 was made through desktop devices. %69 of the searches was made by men and %31 was made by women.

## **%55 OF THE SEARCHES WAS MADE THROUGH MOBILE DEVICES**

Another important development in 2016 was about the devices used for search. In 2016 the percentage of the searches made through the mobile devices was %55.

1 out of 2 people who made a search, made it through a smart phone or tablet.

## **GROWING INTEREST IN TURKISH CUISINE**

Researches suggest that in digital platforms, mobile phones were the most frequently used search devices in 2016. %4 of those who make a search were searching for a restaurant and Turkish Cuisine received the most attention this year, just as it was the case for previous year. %82 of the users searched about Turkish Cuisine. %58 of the men and %42 of the men were searching for a restaurant. %45 of the users who made a search were 25 to 34 years old.

## **MOST FREQUENTLY SEARCHED SEARCH ITEMS IN 2016:**

- Restaurants
- Clothing and accessories
- Ministries and government authorities
- Foundation and associations

# MOST POPULAR MOBILE PHOTOGRAPHY APPLICATIONS OF RECENT TIMES

*Though not always professionally, most of us are now able to picture our best moments with our smart phones.*

**W**hen we want to make a more professional touch to these beautiful moments free or paid mobile photography applications save us the time and effort. So which one is the most practical photography application? Is it possible to acquire a close-to-professional view with such applications? We have made a compilation of Android and iOS based photography applications for you. Here are the most popular photography applications of recent times...

#### **ADOBE PHOTOSHOP EXPRESS**

Mobile version of Adobe Photoshop application. This application makes it possible to edit photographs through various steps which are also used in computer based editing software. With professional touches, you can create unique effects and a perfect look on your pictures. **(Free)**

#### **SNAPSEED**

One of the most extensive photography related applications available is Snapseed and it is free.

This is a professional photo editing application with which you can acquire high quality photographs. You can adjust brightness, contrast, saturation and perform similar fine-tuning on your photographs with ease. Range of filter options is not so rich but frame and enhancement options are really satisfactory. **(Free)**

#### **VSCO**

This versatile and useful application allows taking, editing and sharing pictures. Instagram lovers are familiar with VSCO with which the pictures are not only processed but also internally shared. This application enhances the galleries of some phenomenon names as well and it allows adding minimalist

*A professional mobile application for those who want a professional touch on their photographs: Adobe Photoshop Express*

effects to photographs, manipulating and creating an atmosphere. **(Free)**

It is possible to use certain applications to immediately turn the pictures taken with your mobile devices into art. So, what are the most popular mobile photography applications of recent times?

#### **AUTODESK PIXLR**

Autodesk Pixlr is one of the easy to use photo editing applications and it contains a number of interesting effects. You can make successful collages, you can add a rich variety of fonts onto your photographs and you can re-focus your photographs after you take them, thanks to this app.

Android and iOS based application, gives out quite successful results with its rich range of features. **(Free)**

#### **AFTERLIGHT**

This application is among the most convenient applications to be used for adding frames. Afterlight has tens of filters, effects and many

***Prisma, one of the photo editing applications, turns your photos into artworks with its filters.***

# SELF-CONFIDENCE

*Self-confidence, an emotional requirement for all people, is about how much you appreciate yourself and how much you value yourself. If you have difficulty for meeting this basic requirement, you may experience major difficulties in your future life.*

# WAYS OF IMPROVEMENT

**S**tarting with the thought that other people are superior to yourself, lack of self-confidence shows itself in various forms. For example; losing motivation when not appreciated, cannot tell the real thought, failure to say no, afraid of being criticized are the main indications of lack of self-confidence. Being self-confident is a must to succeed in many subjects. Well, what can we do to get over it? Let's look at the self-confidence improvement tactics that will make your life easier...

## **BE AWARE OF YOUR CAPACITY**

Most of time, you are aware of your own capacity but cannot reveal it. Or you are just not aware of your own capacity. This is one of the biggest factors causing lack of self-confidence. So, focus on your own potential and reveal it.

## **FOCUS ON YOUR POSITIVE SIDES**

Always try to reveal your positive sides rather than seeing the positive sides of the person that you are with and overrating it. Remember, you are more self-confident in a field that you are better at.

## **DO NOT OVERRATE THE PEOPLE**

One of the most significant factors weakening self-confidence is to overrate the people more than it should. This situation presents

you with an unnecessary stress. For this reason, believe in yourself and pay attention to your own opinions as much as the opinions of other people.

### **TAKE RISK**

You may have to take risk in almost every point of life. You have to take risk on your way to success and if you cannot take risk because of not believing yourself, it's a matter of time to miss many opportunities in your life!

### **ALWAYS IMPROVE YOUR KNOWLEDGE**

One of the most significant factors feeding the self-confidence is to improve the knowledge. People who are continuously improve themselves and have information about many subjects, don't experience self-confidence problem.

### **DO NOT AFRAID OF SAYING NO**

Do not bow to the requests of other people and do not have to do what you don't want to. Say no to people and get them use to hear the answer no. Habit of failure to say no because of lack of self-confidence, causes people to have expectations and causes you to live for others.

### **DO NOT BE AFRAID OF NEGATIVE CRITICISMS**

One of the reasons why most people cannot prove themselves in a subject is because they think that they will get

negative responses from the people they face. Of course, you may face with negative criticisms but they should not be the factors that discourage you. Remember, these negative responses are some of the most significant steps to improve yourself. Because you will be aware of your weaknesses and begin to increase your positive sides. After a while, words of other people will lose their significance. Do not allow anything to make you give up.

### **MOTIVATE YOURSELF**

Remember, you are the only one who can motivate you. Both your family and your friends may say that they do everything to increase your motivation but it is ineffective if you don't believe it. So, you should talk to yourself and remind yourself that you can succeed. Anyway, nothing can prevent you if you know you are doing what is necessary for success.

### **DO NOT BE PREJUDICED**

Avoid from prejudiced thoughts such as "I cannot succeed, I cannot learn this subject, I'm not good at this field..." for many subjects such as starting and learning new things. Such thoughts will prevent you from improving yourself by blocking you on the road to success. Always believe that you can do it and do it even better. Show courage to step into a new process. Keep working with patience. After a while, you will see that you are so close to succeed.

***Do not let external factors intervene in your life, if you think you have a lack of self-confidence and you don't want it to prevent your success.***

# THESE HOBBIES COST ALMOST NOTHING!

**Y**ou can start new hobbies to make good use of your free time. Also most of them are great fit for your skills.

But nowadays, these hobbies can be perceived as activities that are usually learned by going to paid courses or paying exorbitant sums. In fact, there are a lot of hobbies that you can do free of charge and that will extremely increase your personal development. For you, we compiled these hobbies that are more colorful than the other and cheap as dirt.

***Running or taking a walk is one of things that everyone can do. Find an appropriate place to run or walk in the city you live in and make it a habit.***

**WRITE**

You can do this by using paper and pencil or put your thoughts down on your personal notebook. Don't worry if you don't like to do this by using paper and pencil. Because there are various technological devices now

such as computer and smart phones that you can write on. Write and relax!

**BE A BLOGGER**

Being a blogger is the new black and among the funniest hobbies that you can do for free. This hobby is just for you if you like to write and want to share your thoughts with other people. Through the videos on the Internet, you can learn how to create a blog, manage it and much more information.

**READ**

**RUN OR TAKE A WALK**

Running or taking a walk is one of

***If you want to get rid of your daily routines and put a new face on your life, you should definitely make these hobbies a part of your life without spending any money.***

things for those who want to make sport a part of their lives. Find an appropriate place to run or walk in the city you live in and make this activity without being have to pay anything.

### **DECORATE YOUR HOUSE**

You can put items in your house that you are bored with use in different shapes with small touches and you can get new decorative items for free. For example; you can turn an old staircase into a library, you can paint a pet bottle that looks nice and use it as a vase or a pencil box. While you can turn a stylish bottle cap into a candle holder, you can decorate your

lampshade with buttons that you don't use.

### **BE VOLUNTEER**

You can also spend your time concerning other people's lives. You can do this by visiting abandoned children and nursing homes. Even you can change many people's lives by taking part in as a free instructor in many places if you desire. In addition to all these, you can donate your blood and be an environmentalist volunteer. Remember, you will increase awareness of at least one person in every way.

### **VISIT GALLERIES**

In Istanbul, there are art galleries in many places that you can visit for free and these galleries are updated regularly. Visiting these art galleries will increase your general knowledge and broaden your horizon.

### **STAY UP TO DATE**

You can make it your hobby to follow the news in politics, economics, fashion, sports and many other fields depending on your interests. It is so easy to do this via newspapers, internet, smart phones. Thanks to this hobby, you will both read, learn and increase your knowledge in many subjects.

### **MAKE INVESTMENT**

Do you want to make savings? You can turn it into a hobby and make good use of your money in various channels by using your computer.

### **LISTEN TO MUSIC, SING A SONG, DANCE**

You worked so hard and you want to leave behind an exhausting day. Then, we can suggest you to listen to music for clearing your head. Even, if you are in an appropriate environment, you can sing along and dance. You will see that you are totally relaxed if you do this every day.

# PRACTICAL SUGGESTIONS AGAINST OSTEOLYSIS

*Unhealthy nutrition, sedentary lifestyle and smoking are major risk factors for osteoporosis (osteolysis) cases. It is important to take early measures against osteolysis which has increased rapidly in recent years.*

**Bone mass in males is more than females. At women who have less bone mass than men, risk of the osteolysis is increasing more than ten times when we include the menopause factor.**

**O**steolysis, which is commonly seen in women after menopause and in men aged 65 and older, occurs with fractures due to decrease in bone density and deformities in the body. Early measures should be taken against osteolysis which has increased rapidly in recent years due to unhealthy nutrition, sedentary lifestyle and smoking.

## **IT IS ALSO SEEN IN YOUNG PEOPLE**

Osteolysis, which is progressing insidiously due to decrease in bone density, is a disease characterized by painful bone fractures, deformities, shortening of height, back hump, waist and back pains. It emerges for women after the menopause and for men at the age of 65 and over. The

conducted researches show that the osteolysis increases in the developing and developed countries. The osteolysis, occurred as age-associated problems is a physical illness and due to genetic reasons it can occur in people at an early age.

## **WOMEN ARE MORE UNDER RISK**

The most important actions be taken for protecting from risk of the osteolysis is to increase the bone mass. After the childbirth, the bone weight peaks by increasing continuously up to the age of 35 years and it starts to decrease in mass and density after this age. Therefore, actions taken till the age of 35 gain significantly favor in terms of increasing the bone mass. Age, gender, activity level and geographical

factors have a great effect on the bone mass formation. At women who have less bone mass than men, risk of the osteolysis is more than ten times when the menopause factor is taken into consideration.

## **HAVE A BONE DENSITY MEASUREMENT ONCE A YEAR**

In the osteolysis treatment early diagnosis is very important. The changes in the bone mineral density of the patient in the risk group should be followed by biyearly checkups. By having a blood and urine test, increase in the bone destruction or decrease in the bone formation can be observed. It is possible to protect from the osteolysis by keeping peak bone density in the best level with checkups and actions taken.

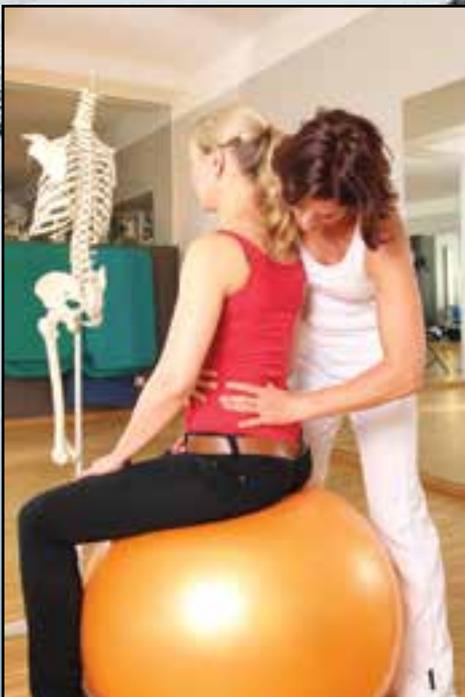

### TAKE INTO CONSIDERATION DOCTOR'S WARNINGS

- For bone health you may consume milk and dairy products and care about calcium intake.
- Stay away from cigarette and alcohol.
- You may push up your physical activities in your daily life. You may prefer stairs to elevator and walking to driving.
- You may receive specialist help before starting the gym.
- You may take care of healthy and balanced nutrition.
- You may decrease falling risk by making necessary arrangement in the place where you live.
- You may not neglect your regular checkups and by consulting on your doctor, have your bone density measurement at the right time.

### RISK GROUP IN THE OSTEOLYSIS

- Spontaneous fractures or fractures generating from a trauma that doesn't result in a fracture,
- Shortening in size more than 4-6 cm in comparison with teenage,
- Small and thin skeletal structure,
- Cigarette and alcohol consumers,
- People with calcium and D vitamin deficiency,
- People who don't exercise or don't make physical activities and are confined to bed, are in the risk group in terms of the osteolysis.

**COMPLETELY PUBLIC SPEAKING LIBRARY IS IN NEW YORK**

The Public Library of New York, the third largest library of America, was established in 1985 by volunteers who wanted to contribute to education. This rich library, approximately reaching 51 million books and with quite peculiar archive, provides service through Internet. Therefore, the library helps researches all over the world as well. Also this library is an inspiration to history researcher and fancier with its historical archive. With a glorious architecture, this library hosted many movies such as Spider Man, Ghostbusters, The Time Machine etc.

# THE LUCKIEST BOOKS OF THE WORLD ARE ALSO IN THESE LIBRARIES!

*The most glorious libraries of the world are here which contain not only books from America to Spain but also documents, ephemeras shedding light on history....*

**T**he world stepped into a new age with the invention of writing that is an important guiding light for all humanity. Desire to keep writing for the future and sharing ensured these writings to be collected into books. After that, a library culture occurred by keeping books in a collective place. Although today's technology has made progress nowadays, the pleasure taken in books and libraries is irreplaceable. So we gathered together the most wonderful libraries of the world for people who like to visit libraries and are bibliophiles.

***The National Diet Library,  
located in Tokyo, was established  
to seek a solution for social  
problems.***

John F. Kennedy  
National Library and Museum

**THE MOST GLORIOUS LIBRARY OF THE WORLD IS IN WASHINGTON**

Library of Congress of the United States of America, the National Library of the US, is one of the most glorious libraries that you can visit. Library of Congress was established in 1800 by the congress of US but it was demolished completely in 1812 due to the civil war. Right after the war, the third President of the United State

of America, Thomas Jefferson donated all books (total 6 thousand) found in his personal library to this library in 1815. The Library has now a great capacity and its architecture looks truly amazing. The library's collection contains over 29 million books, 58 millions manuscripts, 33 thousand bound newspapers, 500 thousand microfilms, over 6 thousand comics and the most important judicial documents in the world in 470 languages.

**THE SECOND LARGEST LIBRARY OF THE WORLD IS IN LONDON**

The National Library of the United Kingdoms, established in 1973, ranks as second among the most glorious and largest libraries. In this reference library that contains printed or digital books, manuscripts, magazines, newspapers, sound and music recordings, videos, patents, maps, seals and drawings belonging to different countries and languages approximately 170 million works of art are found.

**THE LIBRARY THAT CONTAINS ALL PUBLISHED BOOKS IN DENMARK IS IN COPENHAGEN**

The Denmark Royal Library that opened doors to the public in 1793, locates in Copenhagen and has the feature of being one of the largest libraries of the world. The library used right now by the University of Copenhagen contains all books published in Denmark from 17. century until today. The Denmark Royal Library was established by King Frederick III in 1648 however, the Library opened doors to the public in 1793. The library that contains 30.2 million sources is the largest library of Scandinavia. Another feature that makes this library special is the collection of the oriental manuscripts. This collection is considered to take part among the best collections of the world.

**THE THIRD LARGEST LIBRARY OF THE WORLD IS IN MOSCOW**

The Russian Government Library that opened doors to the public in 1862 is also a national library just like others. This library contains over 17.5 million books and the third largest library of the world. Right now in the library there are 44.4 million sources that charm the researchers. A very large scaled collection that contains 13 millions magazines, 350 thousand music and sound records and also 150 thousand maps in 247 different languages, can be considered among these sources. In the library you can find also a copy of all works of art published between 1992 - 1991 in the Union of Soviet Socialist Republics.

**THE LIBRARY THAT IS RESPONSIBLE FOR GATHERING ALL FRENCH PUBLICATIONS IS IN PARIS**

The National Library of France ranks among the best libraries of the world and this library located in Paris where is considered as a city of culture. Even though the collections have been preserved only for a few centuries in this library that was established under the name of The Royal Library in 1461, it is responsible for gathering all publications published in France. This place amazes people who think that there is nothing other than books in a library. Because the library contains a collection that consists of 5 thousand Greek manuscripts. The National Library of France doesn't have only printed publications but also an internet library named as Gallica.

**THE LIBRARY THAT YOU CAN REACH MANY SOURCES IS IN LEIPZIG**

The German National Library whose foundation was laid in Leipzig in 1912 is in service in 3 cities in Leipzig, Frankfurt and Berlin right now. In the German National Library that serves also as the official archive of Germany, all German publications published after 1913 are found. Documents belonging to German talking refugees and exiles from the reign of national socialist between 1933-1945 are being cared very well. The German National Library is the largest library of Germany by far with approximately 22 million sources which consist of 13 million sources in Leipzig, 9 million sources in Frankfurt, over 1 million crotchets and music records in Berlin.

**THE LARGEST LIBRARY OF ASIA IS IN PEKIN**

The National Library of China that is the largest library of Asia, is located in Beijing. The Library of City that is pioneer of this library containing over 26,3 million books, was established by Qing Government in April 24 1909. The name of the library changed after revolution of China to The National Library of Beijing in 1928. Afterwards the library's name changed to its current name. The library contains an interesting collection that consists of over 35 thousand inscriptions, prophecy bones and turtle's shells from the Shang Dynasty.

**THE LIBRARY WHERE PEOPLE WANT TO GET LOSTS IN HISTORY PAGES IS IN MARDIRD**

The National Library of Spain, the largest library of Spain, was opened by Philip V in 1712. This library is an amazing history fancier's interest as much as bibliophiles. The National Library of Spain that resembles Greek temples with its architecture hosts 25 million materials. Alongside rich works of art the library hosts also exhibitions of various artists almost every period.

PEARL OF ADRIATIC SEA

# CROATIA

*Croatia that has one of the best preserved geographies of Europe, is an typical Mediterranean country. Croatia with its untainted nature, national park and spectacular beaches explored by travellers, is waiting for its visitors...*

Croatia defined as pearl of the Adriatic Sea by English poet Lord Byron locates in intersection point of Middle Europe, The Balkans and Mediterranean. The capital of Croatia which is the largest city at the same time is Zagreb and Croatia, with an acreage 56 thousand 594 square meter, consists of many islands. Croatia that was divided into regions for the first time in the Middle Age, after declaring the liberty in 8 October 1991 was split apart as Dalmatia, Dubrovnik and Istria.

Varaždin, Osijek, Gospić and Bjelovar are among important cities of country after

the capital Zagreb. The most appropriate time for traveling the country is a time period between May and September when weather temperature is in mid-range. While weather is perishing in the upcountry during the Winter, coastal regions are under the influence of the Mediterranean climate. Therefore, traveling the country in Spring will be the right choice.

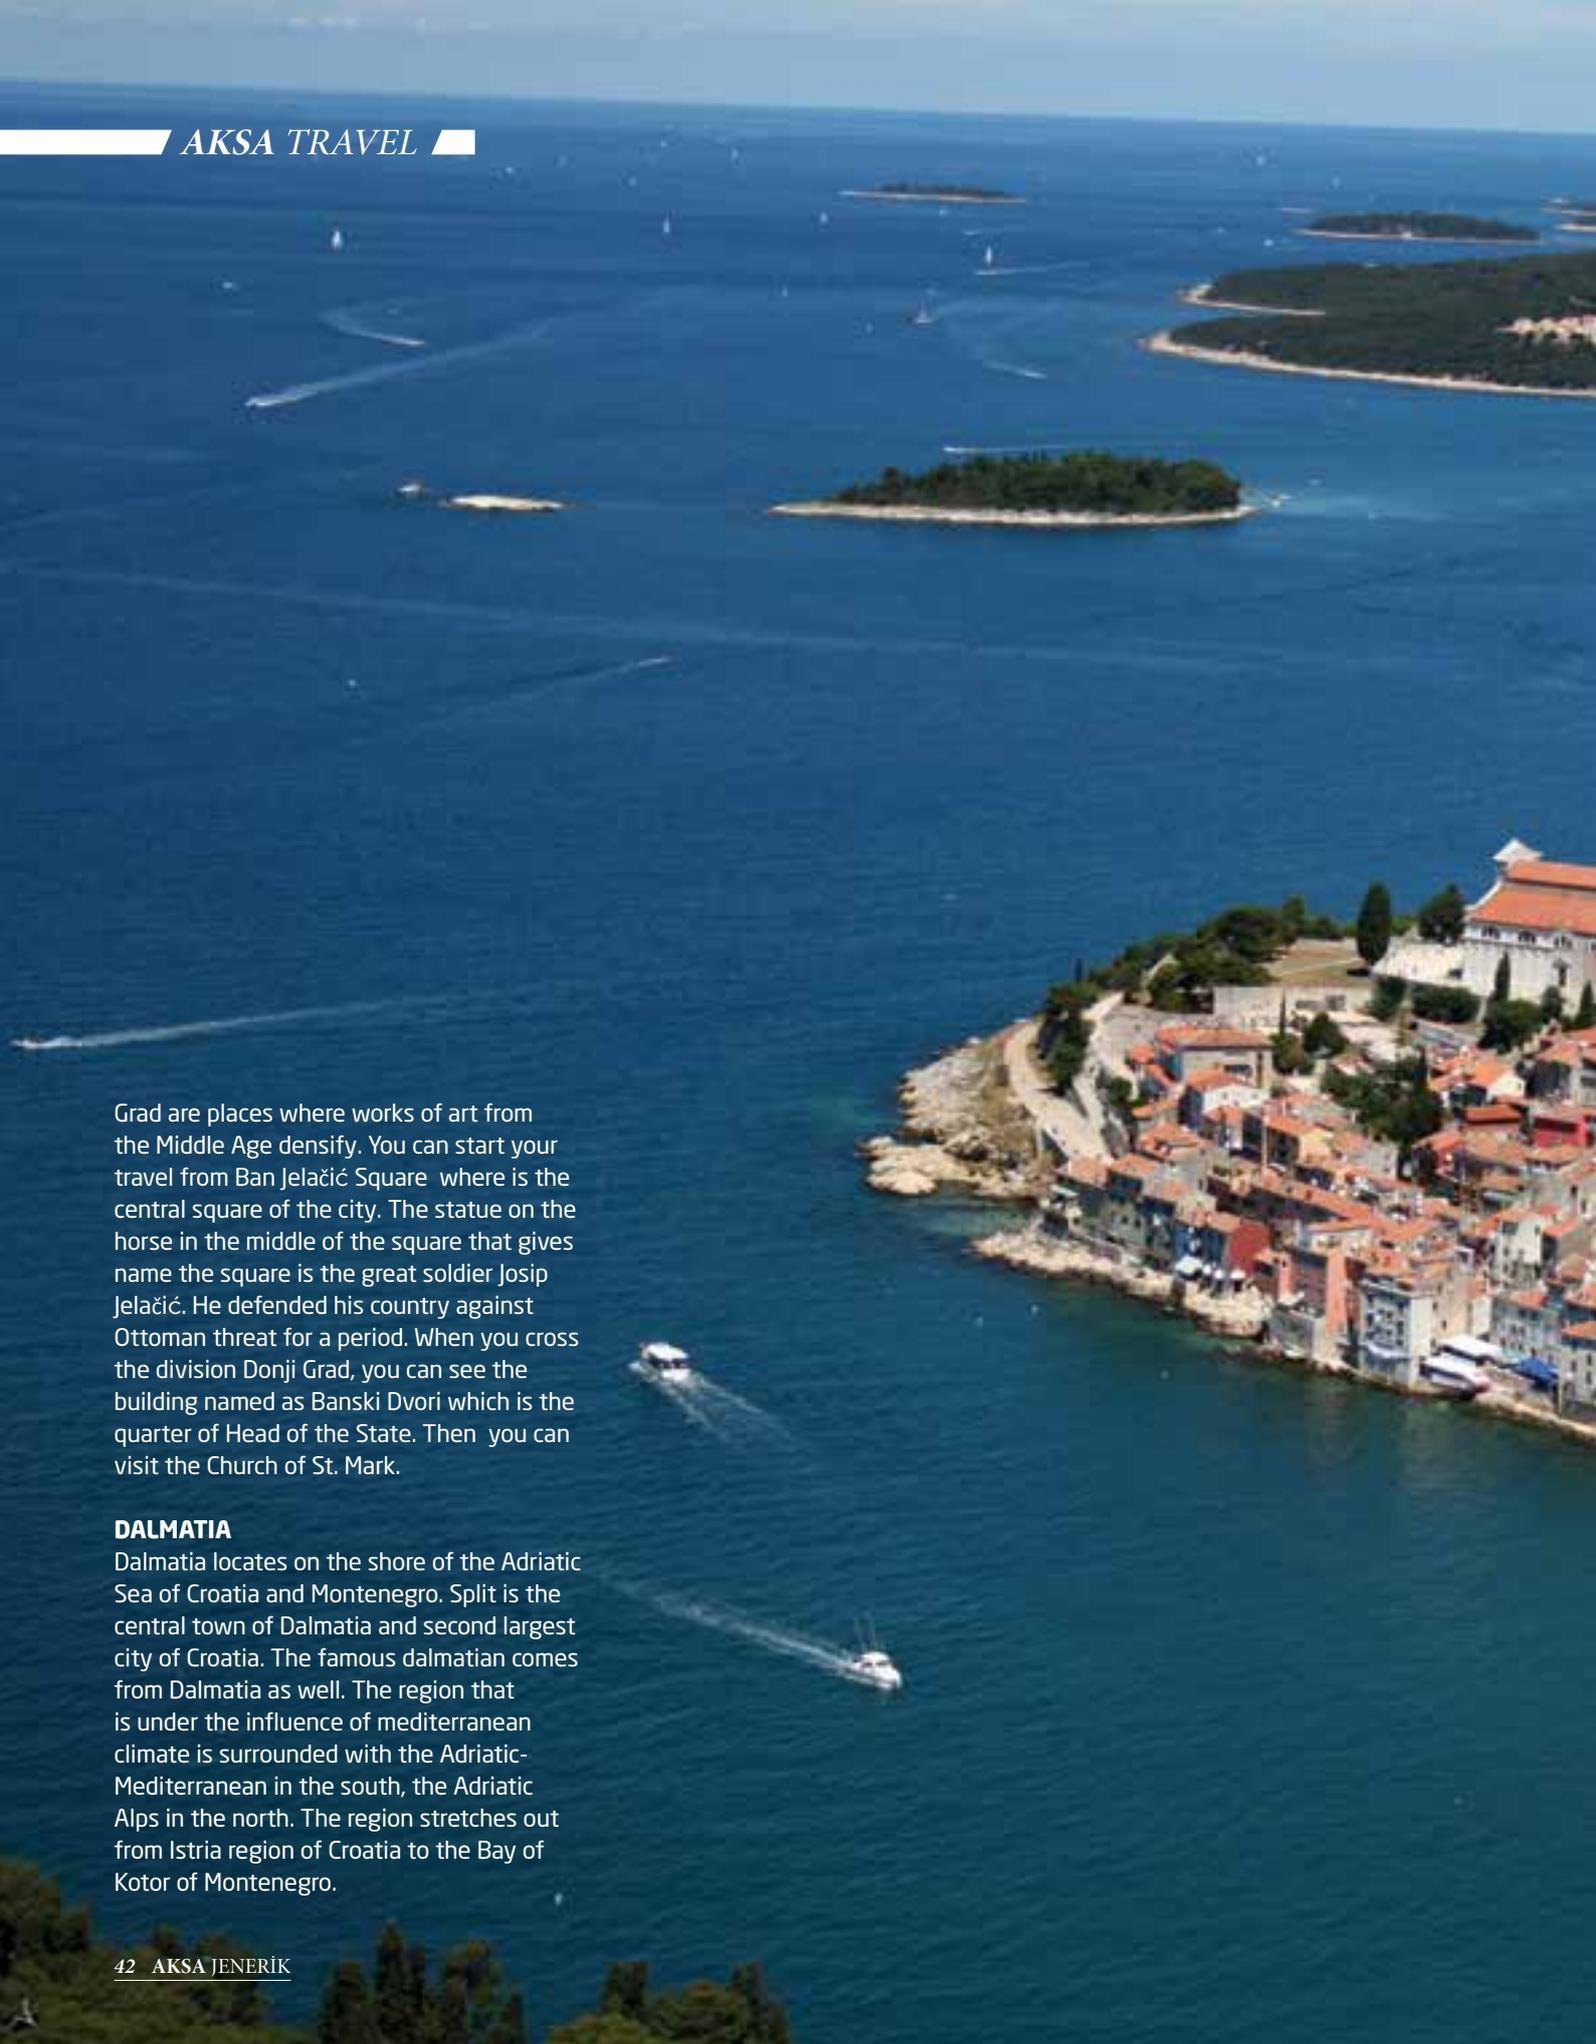

#### **ZAGREB**

Zagreb, the capital of Croatia, consist of two divisions as Gornji Grad (Upper Town), Donji Grad (Lower town). Kaptol and Gradec regions found in division

***“You can climb  
Lotrscak Kula (Tower)  
to look down on  
Zagreb.”***

Grad are places where works of art from the Middle Age densify. You can start your travel from Ban Jelačić Square where is the central square of the city. The statue on the horse in the middle of the square that gives name the square is the great soldier Josip Jelačić. He defended his country against Ottoman threat for a period. When you cross the division Donji Grad, you can see the building named as Banski Dvori which is the quarter of Head of the State. Then you can visit the Church of St. Mark.

### **DALMATIA**

Dalmatia locates on the shore of the Adriatic Sea of Croatia and Montenegro. Split is the central town of Dalmatia and second largest city of Croatia. The famous dalmatian comes from Dalmatia as well. The region that is under the influence of mediterranean climate is surrounded with the Adriatic-Mediterranean in the south, the Adriatic Alps in the north. The region stretches out from Istria region of Croatia to the Bay of Kotor of Montenegro.

*A baroque-music fest named as “Baroque Nights” is held in Varaždin since 1971 and international famous artists as well as Croatian musicians participate in this fest.*

***Dubrovnik or with its old name Ragusa locating on the shore of Adriatic Sea of Croatia is famous with historical artifacts from the Middle Age.***

#### **DUBROVNIK**

Dubrovnik or with its old name Ragusa locating on the shore of Adriatic Sea of Croatia is famous with historical artifacts from the Middle Age. The historical artifacts are damaged seriously in the civil war that broke out during the

secession of Croatia from Yugoslavia in 1991. The city reclaimed pretty much its old view in 2005 with the restoration works started by the UNESCO. The city is famous with the cathedral of Dubrovnik, walls surrounding the city and Lokrum island celebrated for its beaches and botanical gardens.

#### **VARAŽDIN**

Varaždin is the most important touristic center of Croatia. The keep of the city is an important example of city defending from the Middle Age. This keep was

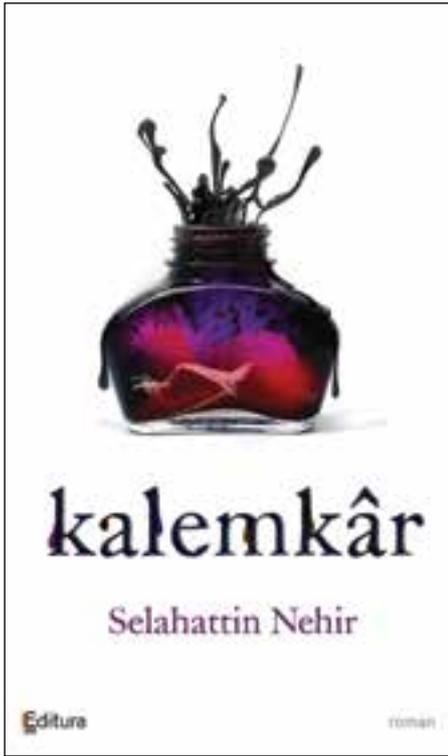

constructed in the fourth century at first and then towers in round shape were added to the construction according to the Gothic architecture. This keep serves as "the City Museum" nowadays. The Sermage Palace constructed according to the "rococo" style architecture is a museum of "Old and Modern Arts Works". "The Croatian National Theatre" building constructed in 1873 is also one of the work of art to see.

#### **CUISINE**

The Croatian cuisine differs from a region to another. Coastal regions show similarity with Greek, Roman and other Mediterranean cuisines especially in terms of sea foods, cooked vegetable and cake baking and also olive oil flavoring the meals and usage of garlic. It can be seen that regions found in the upcountry are influenced by Turkish and Austrian cuisines. Meat dishes, freshwater fishes and vegetable dishes are among the most frequent consumed flavors in this region.

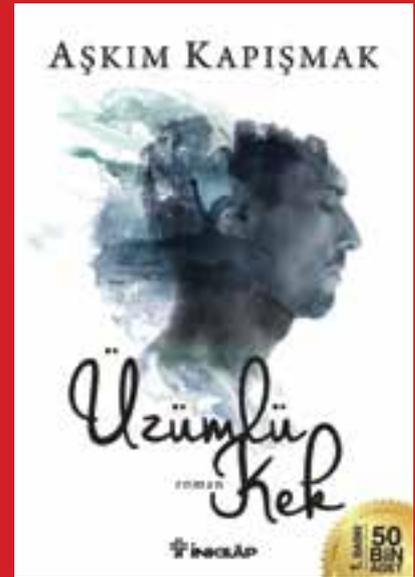

**WORDS ARE THE PROOF OF LIE!  
SELAHATTİN NEHİR**

The writer Selahattin Nehir brings in an impressive text with his new novel Kalemkâr written on cruel memory, our choices, human doomed not to complete, intimacy and distance in new digital world, words, colors and power of passions by centering love story of two readers met thanks to book love. Kalemkâr is a polyphonic and multicolored novel just like the love story he told. The novel creates images in the mind such as shawl with kissing color, horses born from ocean waves, sad eyes with lilac, cakes shaped like book cover, entreated Book Coffee, women that butterflies is born from their hair, giant dervish passing under Bosphorus' water, candles shining through skulls in the Byzantium's walls, wise men selling secrets.

**RAISIN PIE - AŞKIM KAPIŞMAK**

With his self-improvement books that he has written so far, he has been changing your perspective on life... He has written so much about life, relationships, the world and he guided you. But this time, he has written a shocking story to raise awareness... Aşkim Kapişmak, Behavioral Sciences Specialist, mentions in his book "Raisin Pie" about a teenage boy with autism and focuses on "autism is not a disease but a difference". Raisin Pie is a story about Enes, a teenage boy with autism, and his family. Enes likes to make raisin pie, and he mastered in that so well that it is enough for him to taste of piece of pie to be able to give you its recipe. Even though he cannot speak, he can communicate pretty well through the photographs he takes and also he is a very good observer. While you are reading his perspective on life, his stance and, most importantly, the things passing through his mind, you will want to change your way of thinking, you will want to embrace life in a different way...

**9 SIMPLE RULES OF SUCCESS AT WORK GÖKHAN KARAHAN**

The writer and personal development specialist Gökhan Karahan who combines "9 simple rules of success at work" with the observations in the gym, explains the parallels between rules leading to success in gym workouts and success in business life with examples, original short stories, exercises and management theories related to the subject in his book. In his work that contains educative, motivative and thought-provoking elements for students, newly graduates and professionals Karahan asks his reader "Are u ready to look over your life and make a new beginning for positive results?" and says "Your past is here to make you more successful person in the future and this will lead the way in your journey."

**RESIDENT EVIL: LAST PART**

Resident Evil 5: Immediately after the events in the Revenge movie, Alice has become the only survivor of the humanity war against zombies. Now she has to turn back to Raccoon City where the nightmare has begun. Alice is in a race against time and she will fight against new mutant creatures with the help of her old friends. This will be the

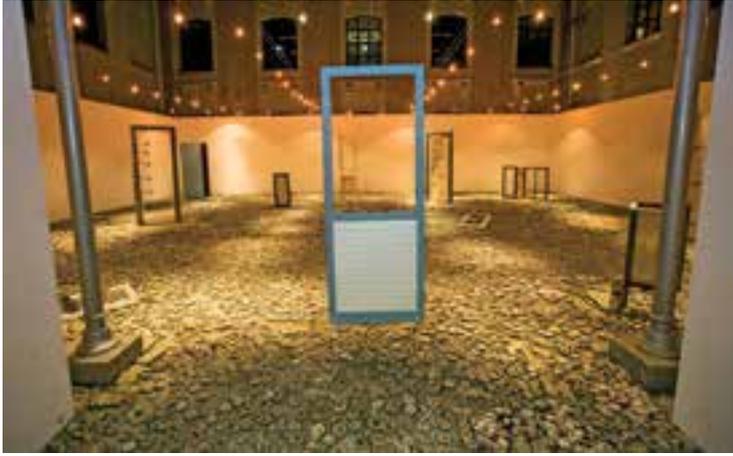

hardest struggle for Alice to save mankind. Once again, Paul W.S. Anderson directed the production, which is the last film sequel of Resident Evil, one of the longest-running series of cinematic history. The movie will come to the theaters on February 3 and will feature Milla Jovovich, Ali Larter, Shawn Roberts, Ruby Rose, Eoin Macken, Rola, Lee Joon-Gi, William Levy and Iain Glen.

**A NEW GENERATION SECRET AGENT: RETURN OF XANDER CAGE**

Vin Diesel will be featured on the movie which is directed by D.J. Caruso and written by D. Brancato and Michael Ferris. In the third part, the blockbuster movie which redefines the genre of agent thriller, tells about the self-inflicted return of Xander Cage (Vin Diesel), who is an extreme athlete and becomes a state agent, and his battles for getting hold of a dangerous weapon known as Pandora's Box with the deadly Alpha fighter Xiang and his team. Xander, who created a brand-new team of thrill-seeker characters, finds himself in a deadly conspiracy. Furthermore, this conspiracy occurs as a trap with references to the top positions of the world governments. The movie comes to the theaters on January 27.

**ISTANBUL RED**

The movie, which will be adapted to cinema by Ferzan Özpetek from his own book, will feature Nejat İşler, Mehmet Günsür and Tuba Büyüküstün. Orhan is an old writer who has lost everything after a traumatic loss and heads for a wild life. He moved to London by leaving everything behind and he started to work as an editor. After many years he came back to Istanbul. Reason behind this comeback is to meet with Director Deniz Sosyal who spent her time mostly in Paris, London and Berlin. After long correspondences, they saw each other in Istanbul. However, Deniz disappeared the next morning. It is an interesting coincidence that Orhan came back to Istanbul and Deniz disappeared. Everybody was worried that Deniz would never come back again. Meanwhile Orhan realized that the things told in Deniz's book were a fancy copy of reality. It would seem that the mysterious life of Deniz was about to be clarified with her disappearance. Istanbul Red will meet with the audience on March 3.

### REBUILDING HOUSE

Work based on the idea of dismantling and rebuilding of a place and especially house concept of Eda Soylu, is an implanting built in a gallery place. Structural materials which consists of both construction materials gathered from debris of different houses and architecture components dismantled from artist's house and carried to gallery place, includes dismantling and rebuilding of concepts of house, place and residence. Soylu drags the audience to a complicated and self contradictory action by implementing natural dried flowers integrated with concrete in the gallery place and asking these to be run down on. The exhibition will meet with art-lovers on January 13 in Gallery KHAS.

### CITY WALLS OF ISTANBUL IN PERIPHERY

The Research Center of the Anatolian Civilizations of Koç University hosts an exhibition named "City Walls of Istanbul in PERIPHERY" (ANAMED). The exhibition remains open until January 2 2017 and the City Walls of Istanbul that was built in 5. century and considered as one of the most important monuments defining characteristic of the city, is the subject of this exhibition. In the exhibition where the curator is Figen Kivilcim Çorakbaşı, the lecturer in the Department of Architecture of Faculty of Architecture and its designer is Yeşim Demir Proehl, cultural landscape carrying marks of the city throughout the 1600-year history, is being displayed.

### REZAN HAS: WITNESS OF 90 YEARS

The exhibition that the Kadir Has University the Museum of Rezan Has will witness the 90-year life of Rezan Has, a name beared with pride by the University, will remain open for visitors in 28 October 2016-15 January 2017 in the Museum of Rezan Has. Art-lovers will witness the 90-year life of Rezan Hanım who is the daughter of Mehmet Bey from Germir , who came from well-known family of Kayseri, and Şehime Yağcızade from Istanbul, the beloved wife of Kadir Has, the mother of Can, Zekiye, Nuri, Rezzan and Aleyna. The exhibition will focus on the reflections of western culture over Istanbul society as a step of modernization attempts of the Republic of Turkey after 1923 with a door opening to the colorful life of Rezan Has, one of the first gentlewomen of Republic.
